

Keeping in mind the decision regarding obtaining online feedback (which was part of the future plan for the session 2019-2020) from students to reduce paper wastage as well due to the exigencies of the Pandemic situation, the Feedback for the session 2019-2020 was collected online via Google Forms. The questionnaire was prepared in a way so that the students could express their opinion, and propose their suggestions for the betterment of the system of online classes and online examinations. Like the previous session, the students have expressed a high degree of satisfaction regarding the students-teacher interaction and the availability of teachers for guidance and counseling both during College hours and after online classes. Some concerns however, were raised by students regarding internet connectivity issues, and several students have expressed the opinion that comprehensibility of the lessons in offline classes was higher than that of online classes. The students have been able to adapt themselves quite well to the system of online examination as they have expressed a high degree of satisfaction regarding the system of online examination and result publication. They have also expressed the need for better sporting equipment and more support in terms of practice sessions. Cleanliness and overall maintenance of the College premises have been a top priority with the students, and the feedback indicates a need for improvement in this area. The summary of the feedback obtained from the students have been forwarded to the College authority for necessary actions.
